

## 1992 Trek Catalog

This is an extract from the 1992 Trek Catalog. It contains details on the two steel-framed road bikes that Trek made this year: models 520 and 400.

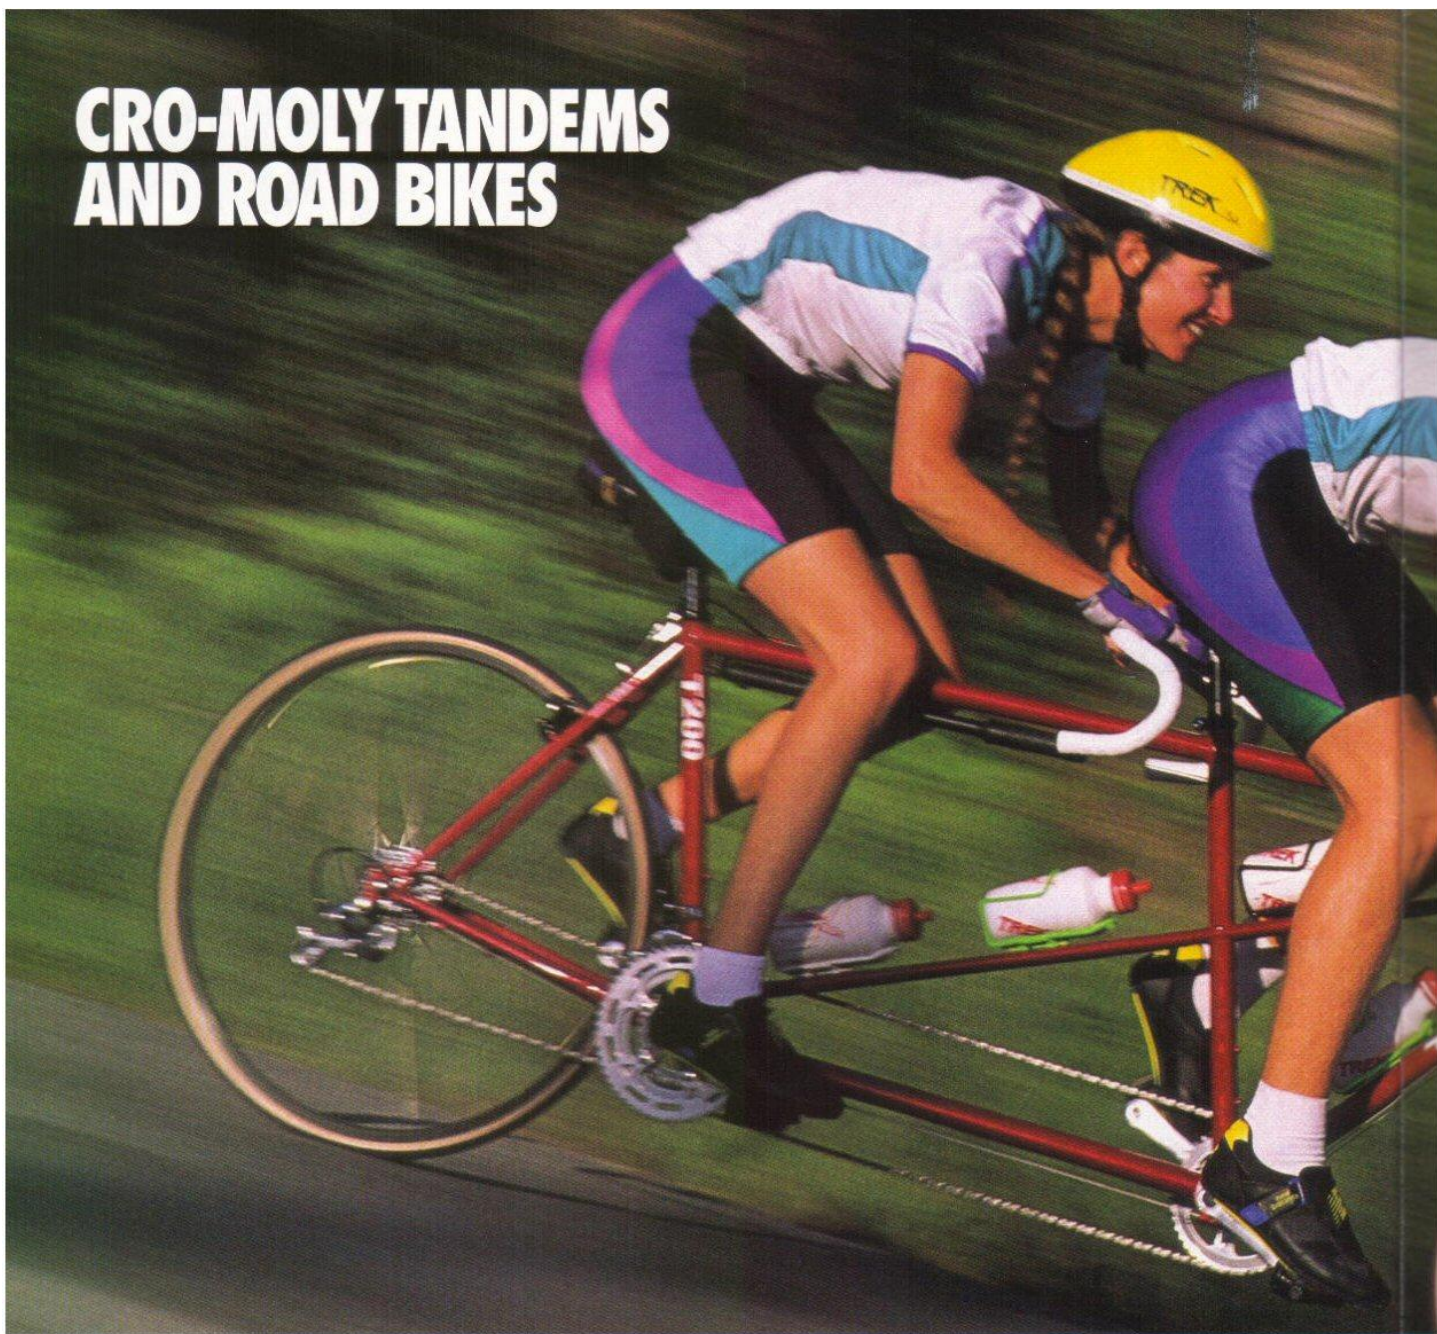

Pages 2 and 3 contain an introduction to, and geometry of, the 520 and 400 plus tandem bikes. Page 4 contains details of the 520 and 400. It is followed by two tables that contain the specifications for all of the 92 Trek bikes (pages 5 and 6). The geometry of mountain and multi-track bikes are on page 7. The colors for the various bike models are listed in the table at the end of this document.

All of the pages can be enlarged to see more detail.

# CRO-MOLY TANDEM AND ROAD BIKES

## Technology Comes In Different Shapes. And Plenty Of Sizes.

At Trek, technology has always been our greatest strength. This goes double for our enjoyable Tandem bicycles. For 1992, we present two models that define our Function Specific Design approach to engineering. Rider-friendly, in layman's terms.

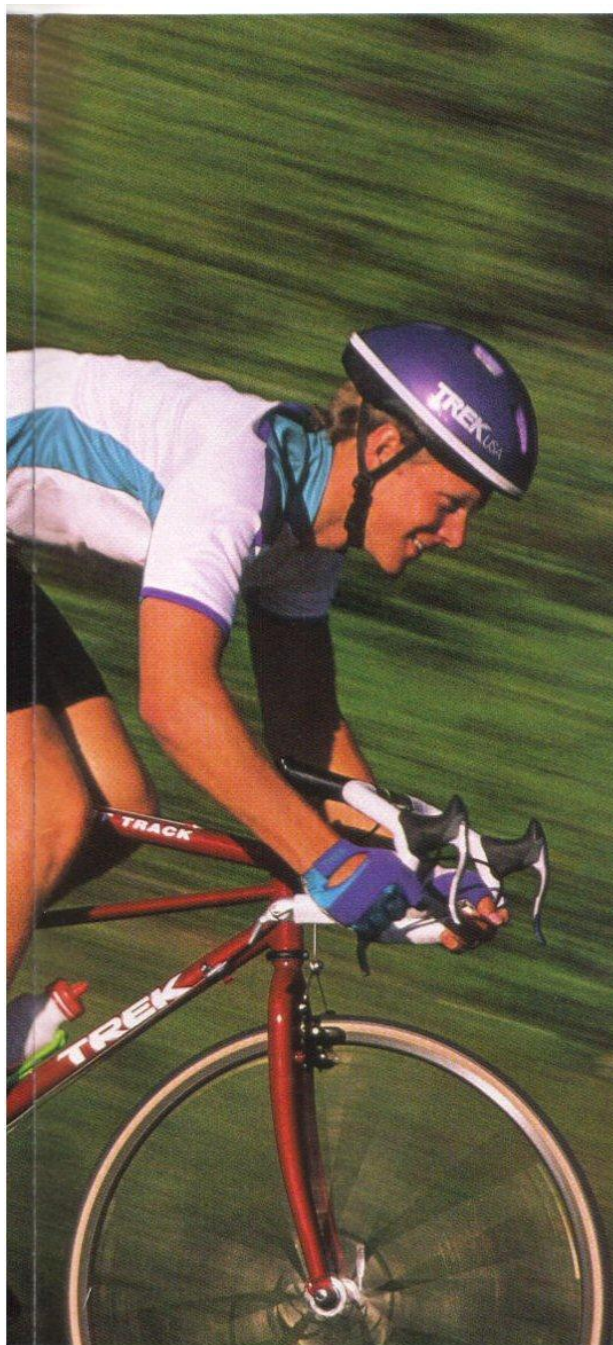

So more of your energy is converted to forward motion, the frame tubes are oversized throughout, including the seat tubes. This gives them increased stiffness and strength. The frame's direct lateral design enhances this stiffness, translating into better handling and the elimination of rear rider "whip."

We also paid particular attention to the rear rider, or stoker position. To provide a more comfortable riding position, we designed the frame with a longer stoker top tube. It's a small refinement that makes a big difference.

In simple terms, our Tandem bicycles prove that two people can ride as comfortably as one. And get twice as much out of it.

Speaking of pairs, a lively ride and a great value come together in our Cro-moly road bikes. Function Specific Design is here as well, with several geometries available to answer the needs of both

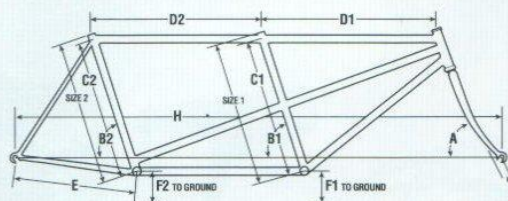

sport riding and touring.

These bikes deliver a comfortable, resilient ride, with double butted lugged construction to ensure a strong, precisely aligned frame. Go ahead, push them. They can take it.

Whether it's an around-the-block workout or long distance touring, they're always up to the task. Durability, performance and affordability. It's all there in our Cro-moly series.

All dimensions are in centimeters/inches unless otherwise stated.

# 520

## Cro-moly Touring

The 520's frame geometry, with a longer wheel base, makes for better stability and allows for carrying heavy loads. The rear carrier is standard, as is a very enjoyable ride.

Sizes: 17, 19, 21 & 23"

Frame/Fork: True Temper AT double butted  
Cro-moly/Cro-moly

Drivetrain: Shimano Deore DX, HyperGlide  
& SuperGlide w/Shimano 7 speed SIS bar  
end shifters

Hubset: Shimano Deore DX 36 hole

Rims: Matrix Titan Tour, 700c

Tires: Matrix Cross Country K Kevlar® belted,  
700 x 30c

Brakeset: Shimano Deore DX low profile  
cantilevers w/SLR levers

Freewheel: Shimano HyperGlide, 12-28,  
7 speed cassette

Shown in Black Forest green w/gold decals.

Kevlar is a registered trademark of DuPont DeNemours, Inc.

# 400

## Cro-moly Sport

The 400 is an affordable fitness bicycle that features a sport geometry for quicker handling. For first-time road riders, this is where the fun begins.

Sizes: 18, 19, 21, 22.5, 24 & 25.5"

Frame/Fork: True Temper RC2 Cro-moly/Cro-moly

Drivetrain: SunTour Blaze, Accushift

Hubset: Sansin 32 hole

Rims: Matrix Titan II, 700c

Tires: Matrix Iso Tech 3, 700 x 25c

Brakeset: Dia Compe Blaze with BRS aero levers

Freewheel: SunTour AP II, 13-28, 7 speed

Shown in white with red decals.
